SUMMARY

I enjoy exploring and learning as much as I can with coding, no matter the language. I like to take what we learn in class and see if I can change it or add to it enough to make something more practical or better. I am looking towards building a game and starting a YouTube channel. Also, I have a passion for graphic design and am currently starting to build a name by making designs and selling them on clothing and mugs. Looking to the future, my goal is to get my designs known and also make a game, or application that I can be proud of.

TECHNICAL SKILLS

Skill	Expertise Level	Skill	Expertise Level
Java	Intermediate	Microsoft Word	Expert
HTML 5	Intermediate	Microsoft PowerPoint	Expert
CSS	Intermediate	Agile / Scrum	Novice
SQL / databases / MySQL	Novice	Windows 7, 10	Intermediate
JUnit Testing	Intermediate	NetBeans IDE	Intermediate
git / GitHub version control	Novice	Eclipse / STS IDE	Novice
Linux / Ubuntu 16.04	Novice	Vi / Vim	Novice
Linux Shell Scripts	Novice	Adobe Dreamweaver	Novice
Adobe Photoshop	Novice	Adobe Illustrator	Novice

CLASS PROJECT

Personal Website

Spring 2016

Class project at Mansfield University

The task was to develop a website of our choosing for the final project. I chose to set up a site to use as a portfolio for the plans I had. I set it up with links at the top of the page and a dropdown box to access more information. The pages were set up to draw attention to various sections and also linked out to the YouTube channel I am going to be attempting as a way of getting practice in video recording and editing to add to my resume in the future.

Personal Venture

Entrepreneurship

Summer 2016 - Present

Selling my designs on products

Over the summer, I decided to look into ways of earning money that I can do in my free time, or turn into something bigger. One way I discovered was designing logos and pictures to put onto shirts and sell them. I started designing a prototype design to run as my first campaign, and it went better than expected. So since then I have been pondering more designs and trying to build a customer base.

EDUCATION

Mansfield University of Pennsylvania

2013 – 2017

Bachelor of Science, Computer & Information Science

EXPERIENCE

Manser Dining Hall – Mansfield, PA

2015 – Present

UTILITIES/COOK

I am responsible for keeping the facility clean and maintained. I have to keep up with stocking, ensuring that there is plenty of each drink in the coolers, especially if there is going to be a rush. I also occasionally am in a station where I prepare and cook pizzas, breadsticks, and also put together orders from the customers.

EconoLodge – Elmira, NY

2014

HOUSEKEEPER

I was a part of the housekeeping staff where I had to clean guest rooms and restock the needed materials in the room for the next guest. If there were any guests that had requests for extra items, or information about the area, I helped them. Every so often I was pulled to help another company hotel down the road when they were short-staffed.
