SUMMARY

I enjoy exploring and learning as much as I can with coding, no matter the language. I like to take what we learn in class and see if I can change it or add to it enough to make something more practical or better. I am looking towards building a name for myself. I have a passion for graphic design and am currently working on making designs and selling them on clothing and mugs. I have also recently started a blog for photography. For the future, I would like to build a mobile application that is useful for more than just a select group of users.

TECHNICAL SKILLS

Skill	Expertise Level	Skill	Expertise Level
Java	Intermediate	Microsoft Word	Expert
HTML 5	Intermediate	Microsoft PowerPoint	Expert
CSS	Intermediate	Agile / Scrum	Novice
SQL / databases / MySQL	Novice	Windows 7, 10	Intermediate
JUnit Testing	Intermediate	NetBeans IDE	Intermediate
git / GitHub version control	Novice	Eclipse / STS IDE	Novice
Linux / Ubuntu 16.04	Novice	Vi / Vim	Novice
Linux Shell Scripts	Novice	Adobe Dreamweaver	Novice
Adobe Photoshop	Novice	Adobe Illustrator	Novice

CLASS PROJECT

Team Website

Spring 2017

Class project at Mansfield University

For my part of this group project, I oversaw designing the website and making sure it looked as if it was for a real business. I spent countless hours working to get the website to fit all the needs for the team, but not be over cluttered. The general design gave a fluid look to each page and the small extras gave it the little touch of creativity and style it needed to make parts stand out. A lot of work was put into making the website and things turned out well in the end.

Personal Venture

Entrepreneurship

Summer 2016 - Present

Selling my designs on products

Over the summer, I decided to look into ways of earning money that I can do in my free time, or turn into something bigger. One way I discovered was designing logos and pictures to put onto shirts and sell them. I started designing a prototype design to run as my first campaign, and it went better than expected. So since then I have been pondering more designs and trying to build a customer base.

Photography

Early 2017 - Present

Photography Blog

I have created a photography blog using the WordPress site. I upload pictures that I take on my iPhone, without any filters or touchups (such as Photoshop). The goal of the website is to show people that you don't necessarily need to have an expensive camera to take great pictures. I have created social media pages for the website so that when a new post is created people can be alerted.

EDUCATION

Mansfield University of Pennsylvania

2013 – 2017

Bachelor of Science, Computer & Information Science

EXPERIENCE

Coldstone Creamery – Jenson Beach, FL

2017 – Present

Server

I work as one of the serves who take orders and create the finished product. When there are little to no customers, I clean the work place, and clean and put away dishes. I aid the other workers in tasks that are needing to be completed. I work on ensuring that there is always a plenty of each product available behind the counter so that when a rush comes we can easily get through it.

Manser Dining Hall – Mansfield, PA

2015 – Present

UTILITIES/COOK

I am responsible for keeping the facility clean and maintained. I have to keep up with stocking, ensuring that there is plenty of each drink in the coolers, especially if there is going to be a rush. I also occasionally am in a station where I prepare and cook pizzas, breadsticks, and also put together orders from the customers.

EconoLodge – Elmira, NY

2014

HOUSEKEEPER

I was a part of the housekeeping staff where I had to clean guest rooms and restock the needed materials in the room for the next guest. If there were any guests that had requests for extra items, or information about the area, I helped them. Every so often I was pulled to help another company hotel down the road when they were short-staffed.
